Risk Associates training helps NT Government Department

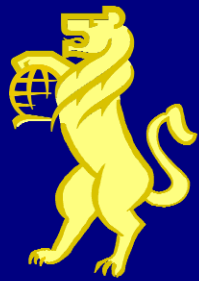

Today Risk Associates concluded risk management training for the Racing, Gaming and Licensing Division of Northern Territory Treasury.

“This is a very exciting transition into formal risk management”, said Dr Aftab Rizvi, in Darwin today. “We have previously focused exclusively on the application of risk management in the context of information security management. We now partner with Methodware Limited (New Zealand) to provide training throughout Australia for its Enterprise Risk Assessor (ERA) and other product range”, Aftab said.

“It is a natural extension of the company’s risk management expertise, and fits in with the ever changing world in which we live. We look forward to continued expansion of our risk management services into more non-information specific fields”, Aftab said.

“We looked around and Risk Associates have all of the skills and experience we required to provide this detailed risk management training”, said John Sealy – Manager Technology Regulation, “The training was a success. Risk Associates proved they know their stuff. We have had ERA for a while and now we can extract maximum value from that tool – all thanks to Risk Associates”.

Risk Associates provide Methodware training from Certified Trainers, risk management training and consulting services, and information security management services. For more information e-mail info@riskassociates.com.au; or phone +61 2 8858-9699.
