Callio Technologies and Risk Associates Sign Partnership

2005-4-13

Both companies ally to form winning combination in the information security market.

Callio Technologies and Risk Associate are pleased to announce that an agreement covering the territory of Australia, India, Iran, Pakistan and the United Arab Emirates has been signed between them, to develop a distribution network for Callio Secura 17799 software in the countries covered by the agreement.

Dr. Aftab Rizvi of Risk Associates is very enthusiastic about introducing this application to Asia, "The market for BS7799/ISO17799 is growing and Callio Secura 17799 is by far the best tool on the market to assist in implementing the BS7799 / ISO17799 standard."

René St-Germain of Callio Technologies also adds: "We've found in Risk Associates the perfect partner, combining recognised expertise in information security and a wide coverage with activities ranging over five countries."

Created in 2001, Callio Technologies specialises in the field of information security and concentrates all its efforts on developing innovative functionalities. Its first product, Callio Secura 17799, is software that offers companies the opportunity to comply with the BS7799 / ISO17799 standard for information security management.

Risk Associates offer expert risk management services. Its principal business expertise is in the areas risk management, information governance, compliance programmes, and information security management. Its international customer base keeps them at the forefront of global trends in risk, governance, and compliance.
